## President's Message

The wonders of the museum are always rewarding! We are having more visitors returning yearly for our newest displays as well as a destination for when family and friends come to visit. Hudson Day car owners enjoyed sharing stories of their cars with our visitors and enjoyed looks from 'passer bys.' A duck even took up residence in our flower bed, hatched ducklings and marched on.

Hudson Commodore Convertible and a 1937 Terraplane Convertible. The weather forecast did not look good but the Hudson owners had no issues driving their beautiful cars to Taneytown. In the garage we had two display cases full of Hudson accessories, parts in original containers and sales materials. We also had a clock awarded to Martin Koons by Hudson. We thank our Hudson friends, Lew and Wanda Mendenhall, John and Lynn Horn, Keith Kerchner and Jon Battle for making it a wonderful day.

The museum is doing very well with the number of visitors picking up. People come visit and then go tell their friends about all the wonderful toys and the beautiful museum property. Hudson day was again very successful with over 55 visitors signing our visitors log.

## Looking Back

by George Naylor

You heard about the Cook Stove in the kitchen, let me tell you about ME'... the Chunk Stove.

I'm in the living room and furnish the only heat in the entire house during the winter. I burn chunks of wood that last all night while my damper is closed. My cousin, the Cook Stove, goes out every night. When all the kids head upstairs every night with warm irons wrapped in towels to warm their feet in order to go to sleep, I get filled with chunks of wood, my damper gets turned almost shut, and I sit there all night keeping the surrounding area slightly warm. It doesn't help much upstairs, as the contents in those chamber buckets under each bed get iced over as the temperature reaches 25/28 on cold nights.

Around 6:30 a.m. a male voice calls "Everyone up" and everyone with their clothes come down, gathers around me and dresses. That male with the loud voice has turned my damper open and I heat up fast! I've been hearing those nice folks that live here and take care of me talking about... some day they hope they can get electric so they don't have to cut wood to fill me up every night. I wonder what they mean?
